LANGUAGE
SERVICES

Mountains, watches, chocolate.
Did we forget anything?

Yes, there is more to Swissness than just the usual clichés. Think security, quality, punctuality and full service.

Managing your company's multilingual communication needs is crucial to keeping your business successful. Partnering with a team of dedicated language professionals can be the smart and cost-effective solution, allowing you to concentrate fully on your core competencies. SwissGlobal Language Services AG is a globally oriented Swiss provider offering full-service specialized multilingual communication solutions. Our inhouse expertise covers financial institutions, the legal sector and pharmaceutical companies as well as other regulated industries where language excellence and service quality in a secure environment are at a premium.

Leading in security

At SwissGlobal we satisfy all security-related laws and regulations and can comply with the individual requirements of security-sensitive clients.

All data are stored in Switzerland in an ISO/IEC 27001:2013 certified data center. Our security management system allows us to continuously improve security measures and processes, and employees are trained in their security-related responsibilities on a regular basis. With this setup we fulfil the stringent security requirements for Swiss banks.

In addition to ISO-certified IT management by our established Swiss-based IT partner, we offer the latest technologies providing state-of-the-art security features.

Our core team

Our core team is made up of highly qualified translators, reviewers and editors trained and experienced in your field of activity. They have the skills and flexibility to deal with any assignment and guarantee fast turnaround with no concessions on quality and security.

To complement our inhouse team and provide the expertise to cover every industry and sector, we also work with a network of experienced freelancers who are subject to a strict internal vetting process.

For specific projects we will also provide translation, review and editing assistance on your premises.

Your own dedicated translators – on our payroll!

For more comprehensive corporate solutions meeting your multilingual needs, Business Process Outsourcing (BPO) may be the answer. A BPO can free up your internal headcount, optimize your resource planning and deliver significant cost savings. A BPO agreement with SwissGlobal ensures you will always work with the same team of professionals with whom you remain in direct personal contact.

Local presence

Our local presence gives you continuous access to our experienced team of dedicated project managers. They are your personal point of contact within our organization and will support you efficiently and reliably in every phase of your order. An important aspect of their job is to advise and assist in developing individually customized services for you.

Technology serving the client

At SwissGlobal you benefit from a cutting-edge Translation Management System (TMS) and the most advanced Computer-Aided Translation (CAT) tools on the market.

Our aim is to combine cost-efficiency with a high standard of security in a seamless workflow that will enhance the quality of your translations and bring you genuine cost savings.

Transparent pricing models

For every project you can choose the service and pricing level that best suits your specific needs, without having to compromise on the quality of your texts. Our project managers are there to help you choose the right model for your particular needs.

Why our proposal is the right one for your company

At SwissGlobal we aim at building a long-term partnership with our clients, based on consistently finding the right solution for their multilingual communication needs and maintaining our overriding commitment to quality. Partner with us and enjoy the following benefits:

- ✦ Inhouse linguists and ISO-compliant network of freelancers with specific areas of expertise, all translating into their mother tongue
- ✦ Local presence for direct access to your dedicated partners and flawless management of your orders
- ✦ The latest TMS technologies for ISO-compliant processes and leading CAT tools for high-quality translation services and immediate cost savings
- ✦ Focus on corporate clients to offer targeted products and services combined with transparent pricing models and extensive business analytics information provided through tailor-made reporting
- ✦ Data security and confidentiality thanks to ISO-compliant processes and ISO-certified IT infrastructure

The story behind the company

SwissGlobal Language Services AG was founded in 2016 by a group of professionals in response to a specific client need for a language service provider focusing on quality services and Swiss values such as innovation, security and confidentiality. Each member of the management team brings a different background at executive level and they all complement one another with their long-standing experience in the language services sector.

Swiss quality for your global needs.
